

Lab Practical 02 – SDG Selection & UX roles

Each UX team should select one of the UN SDGs and assign UX roles to group members

Fill the following table to show your findings

Group ID	Y3S1-WE-40
Group Name:	Pebbles
SDG	SDG No. 9 SDG Name. Industry, Innovation and Infrastructure
Mini Project Title	A Mobile App Supporting Young Entrepreneurs with Startup Toolkits
Stakeholders	• Young entrepreneurs and startup founders • Potential investors and mentors • Government and industry organizations supporting startups • App developers and UX team • Community and society aiming to foster innovation and entrepreneurship
Individual components	Member 1: IT23452916 M.L.Booso UX Role: UX Researcher Individual Components: Entrepreneurial Skill Building & Personalized Learning Novel Technologies: ○ Real-Time Quiz Analytics with Feedback – upon user sign up, the user is assigned a quiz, which determines their skill level regarding entrepreneurial endeavors. Based on the score , they are assigned a level.

	○ Adaptive Learning Engine – Based on the individual level the tutorials are assigned. ○ Gamified Microlearning (badges, levels, leaderboards) – After completing every tutorial, users are given a badge and their level gets updated. ○ Progress Visualization Dashboards – The user can visualize their progress in their dashboard. <i>User Experience Enhancement:</i> • Personalized Learning: Conditional logic ensures content is tailored to the user's learning needs. • Motivation through Gamification: Keeps users motivated with a reward system (badges, levels, etc.). • Instant Feedback: Real-time feedback ensures users can immediately understand their quiz results and improve.
	Member 2: IT23151260 G.L.S.Chanlaka UX Role: UX Designer Individual Components: Startup Planning & Business Toolkit Novel Technologies: ○ AI-Powered Business Plan Generator (OpenRouter API): Users can create a personalized business plan by filling out a form detailing their business model, category, and other relevant information, with AI providing customized suggestions. ○ Market Research Assistant (Scraping Competitor & Industry Insights): The system scrapes data on competitors and industry trends, offering insights into their marketing strategies, helping users make informed business decisions. ○ Document Templates & Smart Checklists: Provides pre-designed templates and smart checklists, guiding users through the process of creating key business documents, ensuring nothing is missed.

User Experience Enhancement:

- **Interactive Planning:** Drag-and-drop tools like the Business Model Canvas make planning easier and more intuitive.
- **Market Insights:** Web scraping pulls in competitor data, keeping users informed with up-to-date industry trends.
- **Template Assistance:** Document templates and smart checklists simplify business plan creation.

Member 3: IT23156760 L.T.Jayawardhana

UX Role: UI Designer

Individual Components: Mentorship, Networking & Collaboration

Novel Technologies:

- **Automatic Mentor Matching (based on goals, location, experience):** Matches users with mentors based on their goals, industry location, and expertise, ensuring valuable guidance and support.
- **Real-Time Communication Tools (chat, video, discussion forums):** Enables instant communication between users and mentors through chat, video calls, and discussion forums, fostering active collaboration. (Socket.io API)
- **Community Idea Board (peer feedback & co-creation):** A platform where users can share ideas and receive feedback from peers, promoting collaborative thinking and innovation.

User Experience Enhancement:

- **Efficient Networking:** The mentor matching system ensures that users are paired with the right mentors based on shared interests.
- **Real-Time Communication:** Users can communicate instantly with mentors and peers via chat or video calls.
- **Collaborative Idea Sharing:** The community idea board allows users to share

and receive feedback on ideas, fostering collaboration.

Member 4: IT23171510 – Puranagedara P M C D

UX Role: UX Tester

Individual Components: Funding Assistance & Financial Tracking **Novel Technologies:**

- **Funding Suggestion Engine (grants, VCs, angel investors):** Recommends funding options like grants, venture capital, and angel investors based on user business needs and stage, helping secure financial support.
- **Crowdsourced Funding & Resource Sharing Platform:** Allows users to access funding and resources from the community, enabling collective support for business growth.
- **Growth & Financial Analytics Dashboard (cash flow, runway, burn rate):** Provides a visual dashboard tracking financial metrics like cash flow, runway, and burn rate, helping users manage their business finances effectively.
- **Automated Expense & Revenue Tracking (via accounting & payment APIs):** Automatically tracks expenses and revenue by integrating with accounting and payment APIs, reducing manual data entry and errors.
- **Predictive Financial Insights (profitability, funding needs, risk analysis):** Offers predictive insights on business profitability, funding requirements, and potential risks based on historical financial data, helping users make informed decisions.

User Experience Enhancement:

- **Data-Driven Insights:** Predictive financial tools help users understand future financial needs and risks.
- **Crowdsourced Funding:** The platform allows users to connect with others to crowdsource resources, increasing access to capital.

Competitive mobile apps	• Startup Grind • Founders Coffee • Y Combinator Startup Library • AngelList • WeWork Labs
User Experience Enhancement	• Personalization & Adaptivity - Every feature adapts to the user's stage, goals, and progress. • Simplified Processes - Guided workflows, smart templates, and AI assistance reduce complexity. • Interactive Dashboards - Visual progress tracking for learning, goals, funding, and networking. • Real-Time Feedback & Alerts - Instant insights, performance feedback, and milestone reminders. • Community-Driven Support - Peer collaboration, resource sharing, and open networking. • Gamification & Motivation - Badges, achievements, and milestone celebrations to keep users engaged. • Seamless Integration - One connected ecosystem (learning, planning, mentorship, funding) with smooth transitions. • Mobile-First Accessibility - Optimized for easy use on smartphones, with offline capability where possible. • Scalable Growth Journey - Designed to support users from beginner entrepreneurs to scaling startups.
